

Keep your employees happy – And your data secure

If the power in your office fails tonight, and all of your computers crash, how quickly can you recover? And more importantly, at what cost? According to industry statistics, 93% of companies that experience a disaster go out of business within 5 years – even if they can recover in the short term.

We're here to ensure your business doesn't become another statistic. Our business continuity solution is about more than just backup – it's designed to quickly revive your services following any unplanned downtime, and ensure your employees are operating productively as soon as possible.

Unparalleled peace of mind

In today's always-on business landscape, maintaining an effective backup and disaster recovery (BDR) strategy is becoming more important than ever before. Data is playing an increasingly critical role in decision-making processes, and the costs and risks associated with downtime are skyrocketing – not to mention the damage your brand and reputation can suffer in the event of a disaster.

DSI's business continuity solution includes features like continuous data protection, cloud-based replication and recovery, and more – all for one low fixed monthly price per protected server.

What does that mean? It means that you can relax knowing that your critical data, emails, reports, and other information are all protected; backed up should a recovery be necessary.

Direct support

Having a backup solution in place is only the first step in a successful business continuity strategy. To minimise the risk of data loss, it is necessary to proactively monitor the entire backup process to ensure things are working as expected.

That's why we've got a dedicated team keeping a watchful eye over your protected servers, ready to jump into action should any problems arise. And if the worst should happen, don't worry – we'll have you back up and running quickly.

DSI - Your Full-Service IT Provider
