**MOBILE SOLUTIONS**  
as critical to their  
**BUSINESS**

## Unparalleled peace of mind

**Smartphones and tablets continue to flood the workplace, and businesses everywhere are racing to appropriately regulate and manage these mobile devices. To support today's bring-your-own-device (BYOD) movement, you'll need a mobile device management (MDM) solution that keeps your employees happy – and keeps you in control.**

DSI's Mobile Device Management is an affordable, easy-to-use cloud platform containing all the essential functionality for end-to-end management of today's mobile devices, including iPhones, iPads, Androids.

With MDM, you can provide users with fast and secure access to corporate data from their personal devices. And with the industry's broadest device support, intuitive workflows, simplified deployment options, and advanced management and security features, we make BYOD simple.

DSI answers the MDM challenge, with an easy-to-use platform that simplifies the management of personal devices – without compromising the user experience, security or privacy. Our solution provides flexible approaches for enrolment, asset management, policy enforcement and the distribution of profiles, apps and docs, all based on device ownership (whether corporate or employee-owned). We'll even handle day-to-day monitoring and management, and only escalate back to you the alerts that you want. It's truly a set-and-forget solution.

Getting started couldn't be easier. In just a few quick clicks, you can start enrolling devices and immediately manage the entire mobile device lifecycle – from enrolment to enterprise integration, configuration and management, monitoring and security, support, analytics and reporting.

## Separating Work and Play

Your employees want to maintain one device for both work and play – they want to access corporate email, then check Facebook, jump back to email and review an upcoming presentation over lunch. This need for “dual personas” is exactly what our MDM solution aims to address. So, go ahead, let your employees leverage their devices – and rest assured that critical business data and applications will remain safe, secure, and accessible. On your terms.

### DSI's Mobile Mobile Device Management includes:

- Powerful, secure monitoring and management of mobile devices
- Fast and easy deployment – enrolment takes just a few clicks
- Multi-device and OS support (iOS, Android, BlackBerry, etc.)
- Secure containers successfully separate work from play
- Selective and remote wiping of corporate data
- Jailbreaking and device rooting alerts
- Direct technical support – we'll manage as much the MDM process as needed
- And more!

## DSI - Your Full-Service IT Provider
