Microsoft Azure

DSI Microsoft Azure Cloud Services
Navigate your journey to the cloud with confidence

DSI Microsoft Cloud Services ensure your customer's journey to the cloud is seamless, secure and successful. Our services are designed to support you with all your Microsoft cloud needs. Whether you are seeking to transition to a cloud solution centring around the Microsoft Azure and Microsoft 365 platforms or looking to improve your existing environment following good practice or focusing on empowering people and enhancing security, we can help to navigate your cloud journey with confidence.

The sky's the limit

DSI offer a comprehensive service from consultative advice, through to migration and ongoing managed support, ensuring you have the right infrastructure and cloud solution in place. We can help guide you through the entire lifecycle providing a simple, seamless, and comprehensive journey to the cloud and beyond.

- **Move the solution to the cloud and remove the requirement to maintain onsite infrastructure**

- **Drive the adoption of additional features and functionality in the cloud to increase return on investment in Microsoft 365 subscriptions**

- **Simplify maintenance and management of the solution to increase productivity**

Whatever you need we are here to help you maximise your cloud investments and manage your ongoing cloud needs.

Microsoft Azure

The Azure cloud platform is more than 200 products and cloud services designed to help bring new solutions to life – to solve today's challenges and create the future.

Trust your cloud - Protect your organisation with multi-layered security across data centres, infrastructure and operations.

Operate hybrid seamlessly - On-premises, across multiple clouds and at the edge. Integrate and manage environments with services designed for hybrid cloud.

Build on your terms - With a commitment to open source, and support for all languages and frameworks, build how you want and deploy where you want to.

Be future-ready - Continuous innovation supports your development today and product visions for tomorrow.

DSI Microsoft Azure Cloud Services

1. Build - A fully managed end-to-end Microsoft Azure experience
Laying the foundations for a robust cloud strategy

DSI's Microsoft Azure Well-Architected Framework service is designed for organisations that are either in the early stages of their cloud computing modernisation journey with Microsoft Azure or have an established Microsoft Azure environment, and are looking to develop a good practice-aligned well-architected framework to underpin Microsoft Azure services.

Key features and benefits:

▶ Good practice deployment to a recognised Microsoft Azure baseline deployment standard, creating a stable and secure foundation for the future adoption of Microsoft Azure services

▶ Improved management, security, governance, and compliance posture

▶ Option to overlay DSI's Microsoft Azure IaaS Managed Service for ongoing management and support of the newly deployed services

2. Embrace - Microsoft Azure Infrastructure-as-a-Service (IaaS)

DSI's Microsoft Azure IaaS service is designed for organisations that are in the early stages of their cloud journey with Microsoft Azure and are looking to explore the capabilities and benefits that transitioning existing IaaS services into Microsoft Azure could bring, with a goal to drive broadscale adoption within their business.

Key features and benefits:

▶ Early identification of potential blockers (without mitigation), enabling a smoother transition

▶ Good practice deployment of identified IaaS workloads in Microsoft Azure, enabling rapid adoption

▶ Increased return on investment through streamlined workloads cost management

▶ Option to overlay DSI's Microsoft Azure IaaS Managed Service for ongoing management and support of the newly deployed services

Key Deliverables

Azure Well-Architected Framework
> Azure Active Directory
> Security Centre
> Azure policy
> Subscription management
> Site-to-site connectivity
> Microsoft Azure for ongoing management and support of the newly deployed services

Azure IaaS components
> Pilot workload migration
> Identity and authentication
> Servers and storage
> Networking
> Firewalls
> Backup and disaster

3. Operate - Microsoft Azure IaaS - Managed Service

DSI can provide ongoing support to organisations that have an existing Microsoft Azure (IaaS) estate or customers that have recently engaged DSI through a Managed Microsoft Azure Infrastructure-as-a-Service (IaaS) service and have a requirement to outsource some or all of their day-to-day operational management and support services to a trusted managed services provider.

Our highly accredited experts will handle customer operational needs to ensure their environment remains fully functional 24/7/365, helping you to maximise the use and value from your investments.

Benefits include:

- **Outsourced support and management tasks to a trusted managed services provider**
- **Support backed by Microsoft Premier (escalation)**
- **Predictable and flexible monthly costs (per-named-resource)**
- **Architectural strategic overlay, supporting evolution of the 'evergreen' cloud services and maximising return on investment**

Key service deliverables:

- **Azure Active Directory Tenant Baseline and Health**
- **Azure Active Directory Identity and Authentication (native) and Connect Service Health**
- **Core Azure Infrastructure services:**
  > Identity and Access Management
  > Servers and Storage (compute)
  > Azure Network Connectivity
  > Azure Network Security
  > Backup and Disaster Recovery

Why DSI?

We have a depth of knowledge and expertise across Microsoft technologies.

Through our outcomes-focused methodology and in-depth expertise driving digital technology solution we can help guide you through the entire lifecycle providing a simple, seamless, and comprehensive journey to the cloud and beyond.
